

Bob Pavlik was born and raised in western PA. He earned his BS degree in Chemical Engineering from the University of Cincinnati. He started his career as a Corporate Project Engineer with Koppers Co. in Pittsburgh, a fortune 500 chemical company, responsible for designing and installing new equipment and processes for Koppers various chemical plants.

Bob then spent the next 20 years with 2 different capital equipment manufacturers in western Ohio and in Savannah, GA. He started as Assistant Product Manager with French Oil Mill Machinery Co in Piqua, Ohio and finished as Director of International Sales and acting General Manager of Carver, Inc. in Savannah. Both companies manufacture and sell process machinery, including rotating equipment, to the agricultural, chemical and food industries. Bob's primary responsibilities included international sales and managing the worldwide distributor and representative networks. He has travelled extensively throughout the world.

Bob has over 20 years experience in international sales and sales management, over 20 years of industrial rotating equipment experience, experience in developing and integrating new products and full product lines into existing business, and experience in developing and managing international sales distribution and representative networks.

Bob, his wife Sherri and their daughter are relocating to the Louisville area. They have 2 older sons Adam and Stephen who are both away at college.
